Harmonogram prac w I połowie 2020

grudzień 2019 / styczeń 2020 – konsultacja z ekspertami narodowymi na temat potencjalnego zakresu działań w ramach każdego z celów priorytetowych i szczegółowych

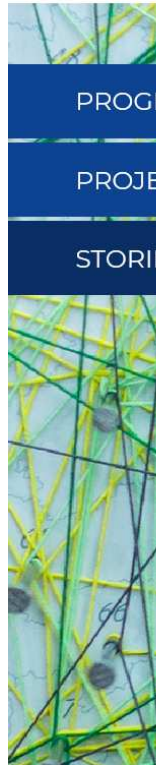

marzec 2020 – dyskusja o typach projektów i systemie monitorującym (Grupa Robocza)

Konsultacje społeczne propozycji oferty tematycznej nowego programu:

marzec 2020 – ankieta on-line na temat priorytetów i celów szczegółowych nowego programu

marzec /kwiecień 2020 – krajowe dialogi partnerskie - spotkanie

maj 2020 – zatwierdzenie oferty tematycznej (Grupa Robocza)

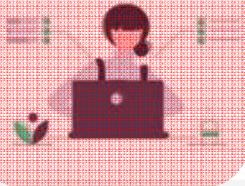

PERMANENT

ONLINE PARTICIPATION PLATFORM

On this website we will keep you abreast of latest developments regarding the programming process. In addition, we invite you to leave inputs and feedback on the programming process in our online discussion group on LinkedIn.

>>> [Contribute on LinkedIn](#)

AUTUMN 2019

SURVEY ON TERRITORIAL NEEDS AND CHALLENGES

In September and October we carried out a survey among selected national thematic experts to collect inputs for the future programme strategy. The aim was to find out, in which thematic fields our partners perceive the highest needs for transnational cooperation to meet future challenges.

AUTUMN 2019

PARTICIPATORY SESSION AT EU REGIONS WEEK

At the EU Week of Regions and Cities 2019, we hosted a participatory session, in which practitioners and policy makers shared their views and ideas on the future orientation of our programme. Inputs collected informed the territorial analysis.

>>> [Read more about the session](#)

AUTUMN 2019

STRATEGY AND CONSENSUS BUILDING WORKSHOP

In November we invited selected national thematic experts to discuss national strategic preferences and build consensus on future policy choices. We also used the workshop to collect initial inputs regarding potential topics, actions and target audiences.

SPRING 2020

NATIONAL PARTNER DIALOGUES

In parallel to the survey, national contact points will organise partner dialogues to collect inputs. These events will allow for more in-depth discussions and help to collect more qualitative inputs in addition to the transnational survey.

>>> [Dates to be announced in 2020](#)

SPRING 2020

SURVEY ON FUTURE PRIORITIES AND INTERVENTIONS

This survey will be launched towards the end of March 2020. It will collect feedback on strategic choices taken and inputs on potential fields of action and target groups. The survey will be widely distributed to ensure broad participation.

>>> [Launch to be announced in 2020](#)

SPRING 2020

FOCUS GROUPS FOR TRANSNATIONAL COORDINATION

In focus groups with overlapping transnational Interreg programmes and other key players like macro-regional strategies we will collect feedback and raise awareness on the strategic choices taken. This will also strengthen coordination among cooperation instruments in central Europe. *Upon invitation only.*

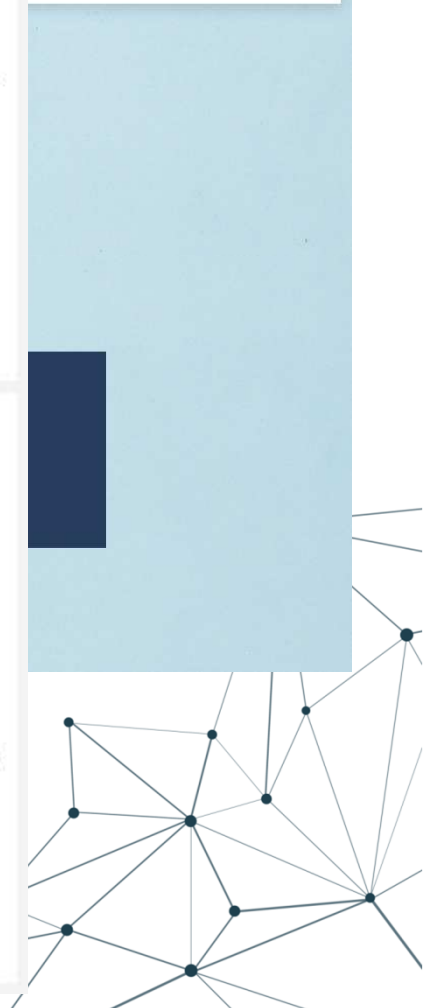

SUMMER 2020

STRATEGIC ENVIRONMENTAL ASSESSMENT

Last but not least we will involve national environmental agencies as well as citizens in our regions and cities in assessing the environmental impacts of the new programme. This will ensure the sustainability of all our future funding.

>>> [Details to be announced in 2020](#)

October 2017 - September 2020

EUROPEAN FLAGSHIP

Priority area: Not

BEST

Industrial waste waters are a considerable challenge for municipal water treatment plants as they require special treatment and management. In this project, local water utilities, waste water treatment plants, industrial companies and permitting authorities elaborate and test guidelines and procedures for a more efficient management of industrial sewage.

Summary

Problem to be solved
BEST wants to improve the treatment of industrial waste waters. Waste water treatment plants are major point sources of nutrients and hazardous substances entering local waters and the Baltic Sea. The treatment process covers a long sequence of steps easily disturbed if water waters of abnormal content or amount are discharged to the system without control. Such situations may occur especially concerning industrial waste waters, and cause capacity problems, disturbance of biological treatment processes and pollution of waste water sludge which all lead to increased pollution to the Baltic Sea.

Actions
BEST develops more efficient management and co-operation methods among waste water treatment plants, industries and municipalities in order to improve the control of the treatment process. BEST also pilots technical pretreatment solutions that dampen peaks in the industrial waste water discharge to the plant and thus improve treatment. The project further organizes trainings and facilitates exchange of good practices in order to ensure and spread joint learning and transnational cooperation.
